Hybrid SMID+Debt is represented by Nifty MidSmall 400 TRI (70%) plus Debt is Crisil Short Term Bond Index (30%). Time Period: July 20, 2016 - Nov 28,, 2025. The above simulation is for illustration purpose only and should not be construed as a promise on minimum returns and safeguard of capital. Bank Of India Mutual Fund is not guaranteeing or forecasting any returns.

# What is the way to manage the Mid & Small cap volatility?

### Unique Solution = SMID (Mid & Small Cap) + Debt

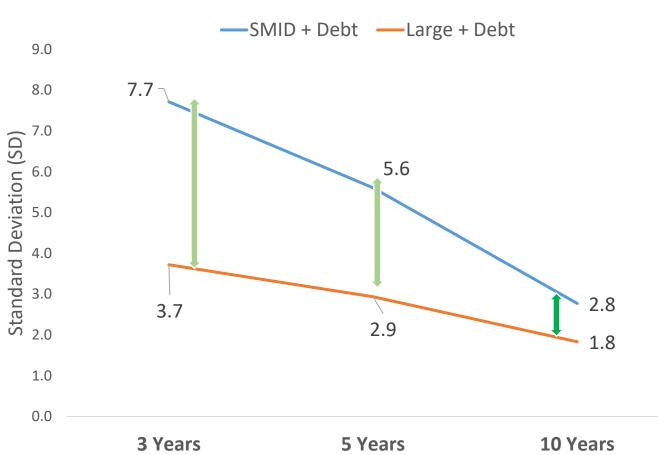

6

#### Volatility Reduces Significantly Over Long Term

| Risk = SD    | 3 Years<br>(%) | 5 Years<br>(%) | 10 Years<br>(%) |
|--------------|----------------|----------------|-----------------|
| SMID + Debt  | 7.7            | 5.6            | 2.8             |
| Large + Debt | 3.7            | 2.9            | 1.8             |
| Difference   | 4.0            | 2.7            | 0.9             |

SMID plus Debt strategy, **volatility reduces significantly** over long term

Past performance may or may not be sustained in future. Data as on Nov 28, 2025. Source: ACEMF (Rolling Returns). Returns are Compounded Annualised Growth Rate (CAGR). Large Cap is represented by Nifty 100 TRI; SMID is represented by Nifty MidSmall 400 TRI (70%) plus Debt is Crisil Short Term Bond Index (30%) Volatility/Risk is calculated based on daily returns and is annualized. Standard deviation is a statistical measure of the range of an investment's performance. Time Period: Jan 01, 2005 – Nov 28, 2025. The above simulation is for illustration purpose only and should not be construed as a promise on minimum returns and safeguard of capital. Bank Of India Mutual Fund is not guaranteeing or forecasting any returns.

## **SMID Businesses Have Wider Sector Coverage**

## Why SMID + Debt Hybrid Strategy?

9

## Small and Mid Caps are Under-researched Vs Large Caps

- Mid Caps have limited analyst coverage which results in pricing inefficiencies and hidden opportunities
- Mid Caps have Information Asymmetry =
   Opportunity, and an in-depth research can lead to
   early-stage discovery
- Mid Caps have higher potential for alpha generation; more room for fundamental research to add value

#### **Tax Structure**

#### Tax Impact to Investor's Selling of Securities (Equity/ Debt)

| Selling of Securities         | Direct Equity Investors                         | Aggressive Hybrid Fund*                            |
|-------------------------------|---|--|
| Equity security held <1 year  | STCG @ 20% applicable                           | No tax incidence                                   |
| Equity security held >=1 year | LTCG @125% applicable                           | No tax incidence                                   |
| Fixed Income security         | Tax at marginal tax slab                        | No tax incidence                                   |
| Tax Deferment                 | Tax incidence each time when selling securities | Tax incidence only at redemption/<br>switching-out |

<sup>\*</sup>Tax incidence may occur at the time of redemption depending on the exit load and tenure of the investment. STCG –Short term capital gain; LTCG –Long term capital gain

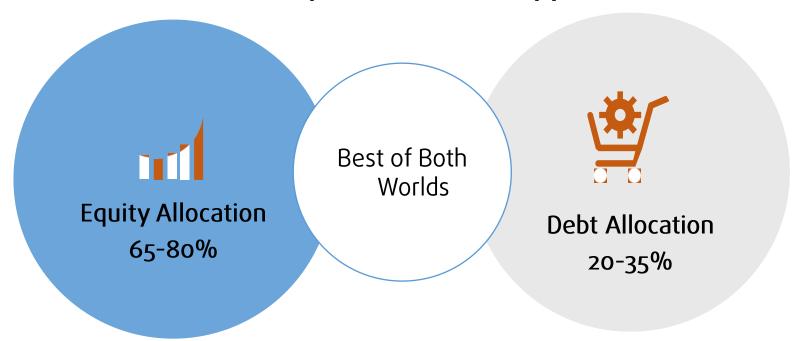

## Why Bank of India Mid & Small Cap Equity & Debt Fund?

#### Unique Blend of Mid & Small with Debt Asset

#### **Fund's Unique Investment Approach**

Equity component follows a bottom-up best ideas strategy including a selective allocation to mid caps and small caps

Debt component follows a tactical approach across sovereign bonds and corporate bonds

#### **Distinctive Portfolio Construction Approach**

## Portfolio Construct

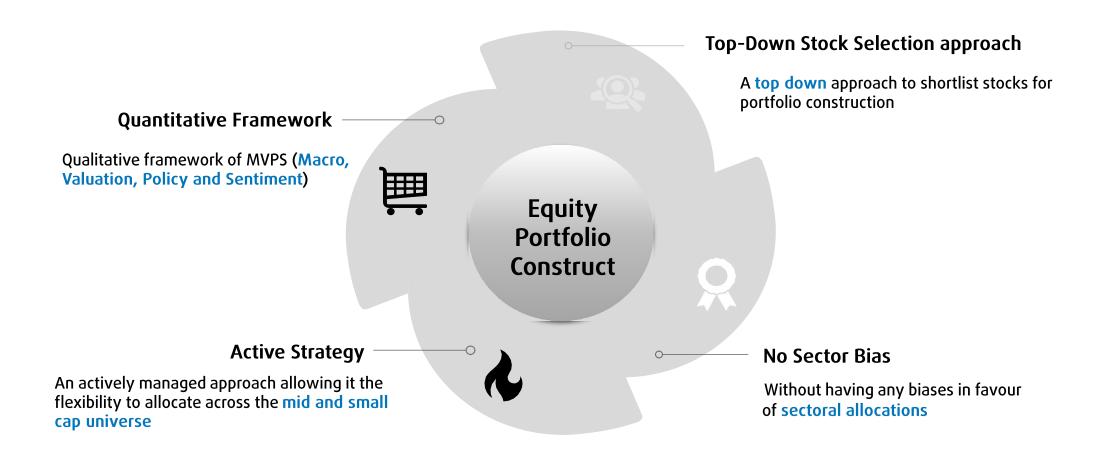

- 70-80% of portfolio is invested in mid and small cap companies
- Fund is not allowed to invest in large cap companies
- 20% of portfolio is invested in Debt with duration of around 2-4 years

## Allocation Limits

- Equity allocation is managed between 65-80%
- As and when any midcap allocation become large cap, fund exits those stock
- Portfolio is normally allocated in 40-50 stocks

#### **Equity Investment Approach**

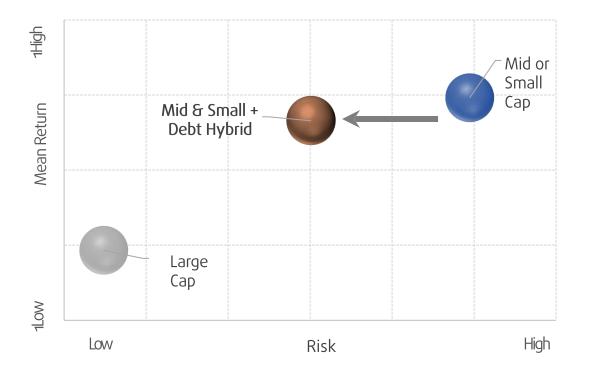

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the markets. Investment approach is based on current market outlook and is subject to fund manager discretion. Investors are advised to refer SID for detailed asset allocation and investment strategy of the scheme.

#### **Fund Positioning Relative to Risk**

Risk - Return Matrix

- Bank of India Mid & Small Equity & Debt Fund is positioned to offer middle path to those investors who are hesitant to commit fully to Mid and Small Caps
- The fund provides growth potential and optimal steadiness with exposure to 20-35% debt and 65-80% Mid and Small Caps

#### Why have we Chosen Debt over Large Cap?

Fig i: When market corrects, Large caps, Mid caps as well as Small Caps fall

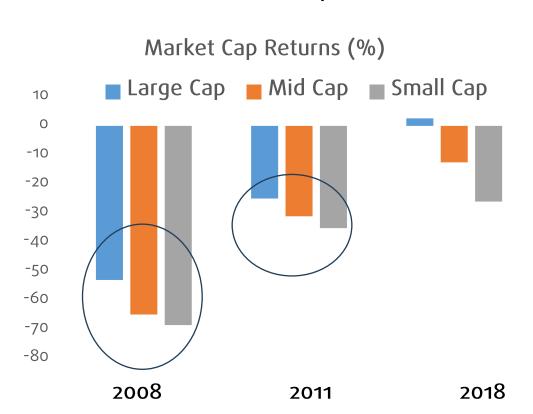

Fig ii: However, Debt manages volatility relatively well

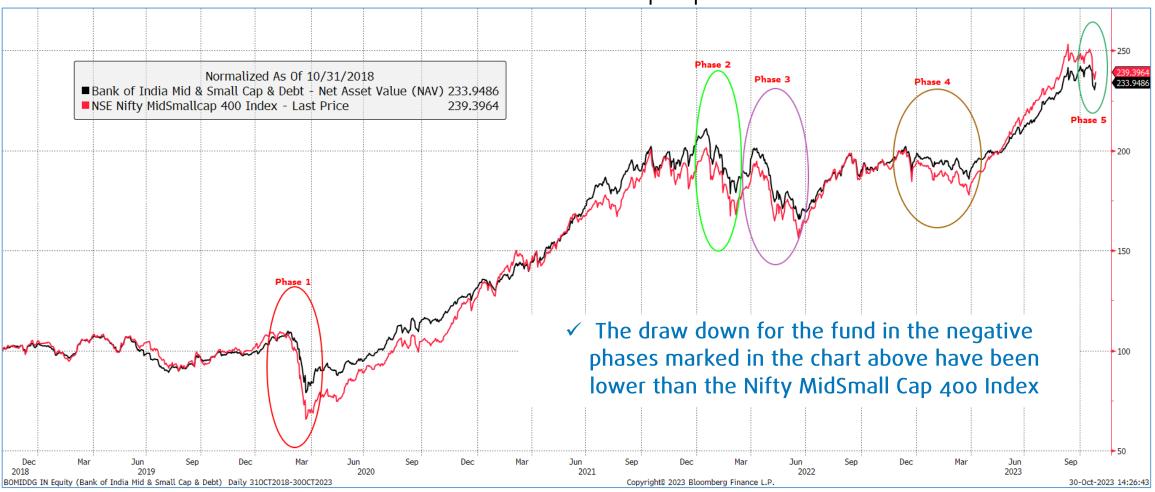

| Asset | 3 Year<br>Retur |       | 5 Year Rolling<br>Return (%) |      |  |
|-------|-----------------|-------|------------------------------|------|--|
| Class | Median          | Min   | Median                       | Min  |  |
| Large | 14.3            | -5.0  | 14.0                         | -0.7 |  |
| Mid   | 22.2            | -8.3  | 18.2                         | 0.3  |  |
| Small | 21.8            | -17.5 | 14.7                         | -5.8 |  |
| Debt  | 7.8             | 4.9   | 8.2                          | 6.2  |  |

Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. Data as on Nov 28, 2025. Source: ACEMF (Rolling Returns). Returns are Compounded Annualised Growth Rate (CAGR). Large Cap is represented by Nifty 100 TRI; Mid Cap is represented by Nifty Midcap 150 TRI; Small Cap - Nifty Smallcap 250 TRI; and Debt - Crisil Short Term Bond Index..Time Period: July 20, 2016 - Nov 28, 2025. The above simulation is for illustration purpose only and should not be construed as a promise on minimum returns and safeguard of capital. Bank Of India Mutual Fund is not guaranteeing or forecasting any returns.

#### Fund has Cushioned well During the Volatile Markets

✓ Funds construct has allowed to manage drawn down and enable upside participation as compared to full scale mid and small cap exposure

## Fund has Cushioned Well During the Volatile Markets

|         | Nifty Midsmallcap 400 Index | Bank of India Mid & Small Cap Equity & Debt Fund |
|---------|-----------------------------|--|
|         |                             | olute Return                                     |
| Phase 1 | (39.56)                     | (35.29)  |
| Phase 2 | (17.52)                     | (14.91)  |
| Phase 3 | (15.41)                     | (12.28)  |
| Phase 4 | (11.54)                     | (8.85)   |
| Phase 5 | (6.97)                      | (6.65)   |

✓ The draw down for the fund in the negative phases has been lower than the Nifty Midsmallcap 400 Index

# #4.2 Fund has Generated Superior Returns vis-à-vis Benchmark as well as the Broad Market

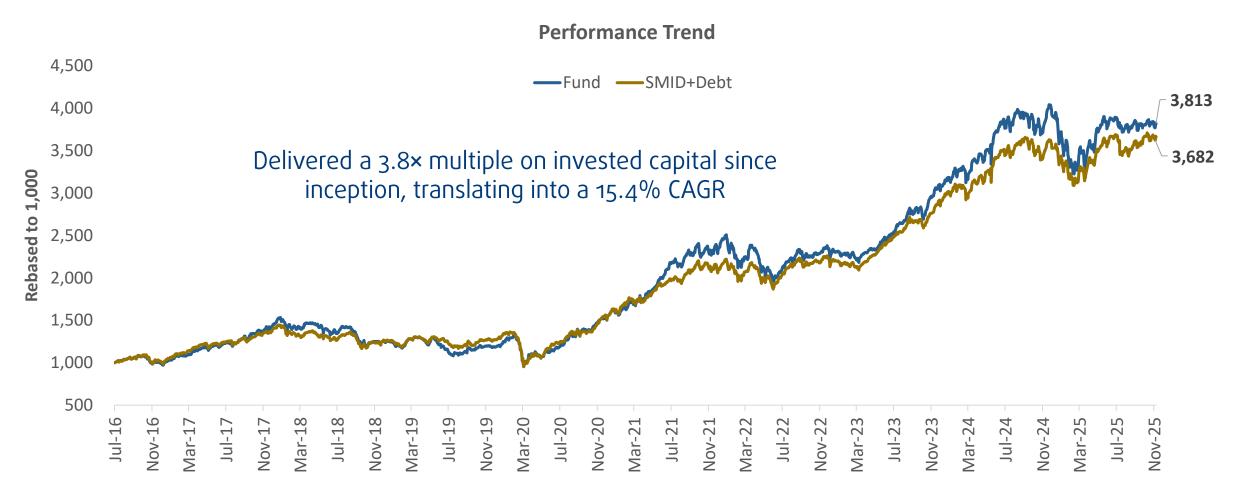

#### Performance Trend – CAGR %

#### Bank of India Mid & Small Cap Equity & Debt Fund

The fund allocates predominantly to undervalued mid- and small-cap businesses to capture alpha beyond what is typically available in large-caps

#### **Fund Suitability**

#### Moderate to High-Risk Investors

Looking for growth with relative stability, not 100% equity exposure, primarily mid aged investors

# First Step towards Mid & Small Cap

Wanting to enter high risk portfolio but afraid of volatility

# Goal-Oriented Investors

Saving for long-term goals like retirement, children's education, or house purchase

#### Investors Seeking Better Risk Adjusted Returns

Wanting to benefit
from equity
upside and debt
protection during market
swings

## Fund has Generated ~3.8X Returns Since Inception

Regular Plan
